DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 14-15, drawn to a device for measuring the supply current, classified in class 324, subclass 769.
- II. Claims 8-13 and 16-17, drawn to a device for measuring the supply current, classified in class 702, subclass 119.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because of transistors and MOSFET. The subcombination has separate utility such as claimed.

The inventions are distinct, each from the other because of the following reasons:

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2829

If applicant elects either one of the above inventions (i.e. invention I or II), further election is required as follows because this application contains claims directed to the following patentably distinct species of the claimed invention:

A) Species of fig. 5b-5c with CMU 6 of fig. 7a or 8a.

B) Species of Fig. 10a-10b.

If applicant elects Species A) further election is required as follows:

A1) Species of fig. 5b with CMU 6 of fig. 7a or 8a.

A2) Species of fig. 5c with CMU 6 of fig. 7a or 8a.

If applicant elects Species B) further election is required as follows:

B1) Species of Fig. 10a

B2) Species of fig. 10b

If applicant elects Species B1 or B2 further election is required as follows:

a) current source controlled by ATE 8

b) current source controlled by on/off-chip I_{DDQ} monitor.

If applicant elects Species a) further election is required as follows:

Species of fig. 12a or 13a or 14a or 15a.

If applicant elects Species b) further election is required as follows:

Species of fig. 12b or 13b or 14b or 15b.

Art Unit: 2829

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Gresens on 09/13/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
